

SCIENCE LEARNING JOURNEY

TRANSITION TO SECONDARY

Light Pollution and Renewable Energy

What is evolution and Inheritance?

How do we group and classify animals?

Can you describe Electrical Circuits and Symbols?

What is global warming and plastic pollution?

What is a lifecycle?

What are reversible and irreversible changes?

What are the properties and changes in different materials?

YEAR 6

How do I keep my body healthy? What is the Circulatory system?

What is light and shadow?

What is the digestive System?

What is deforestation? How do we conserve our energy usage?

What is space? Planets and the solar system?

What are the states of matter?

YEAR 5

How do we group and classify living things? What is a habitat? What is a food chain?

What is Electricity?

What's that sound? How is sound produced?

Which types of forces are there?

What is food waste?

What is important for living things to survive?

What are forces and magnets?

What do plants need to grow?

YEAR 4

YEAR 3

What is light? LINK GEOGRAPHY

What is underground? Rocks, soils and fossils

What does wildlife do for us? How can we help wild life?

YEAR 2

What is a lifecycle?

What are the uses of everyday materials?

What do plants need to grow?

LINK ART What happens during the seasons?

Which plants are all around us?

What are habitats? How do living things survive in their habitats?

What are animal's needs? What are human's needs?

How do we care for our planet?

YEAR 1

EYFS

What sort of animal are you?

What are the 5 senses?

What are every day materials?

What are the properties of every day materials?
