

Perimeter of polygons

1 Calculate the perimeters of the polygons.

2 The side length of each regular polygon is 5 cm.
Work out the perimeters.

How did you do it?
Compare methods with a partner.

3 Each regular hexagon on the grid has a side length of 2 cm.

What is the perimeter of the shape?

- 4 Three regular polygons each have a perimeter of 120 cm.
What is the side length of each polygon?

a) square

b) equilateral triangle

c) hexagon

- 5 Tiny measures the total length of four sides of this regular decagon.

The total
length of four sides
is 22 cm.

Calculate the perimeter of the decagon.

- 6 A tennis court has a length of 24 m and a width of 11 m.
A football pitch has a length of 105 m and a width of 68 m.
Scott walks around the perimeter of a tennis court four times.
Aisha walks around the perimeter of a football pitch once.

Who walks further?

Show your workings.

- 7 The length of a rectangle is 4 times its width.
The perimeter of the rectangle is 85 mm.
What is the length of the rectangle?

8

- A, B and C are all the same width.
- A is a square with a perimeter of 32 cm.
- B and C are rectangles.
- The length of C is twice the length of A.

Work out the perimeter of the shape.
